WEBSCAN

High Performance Bar Code Verification

introduces...

TruCheck™
Data Matrix Bar Code Verifier

NEW

System features:

-ISO15415 verification!
-Fixed optics, no operator adjustments
-Easy-to-use, hands-free operation

Yet Another Industry 1st For Webscan!

Data Matrix bar code verification has finally arrived! The industry asked and Webscan delivered! Webscan is pleased to introduce the TruCheck™ Model 401 Data Matrix bar code verifier designed to measure in accordance with the yet to be released ISO15415 specification.

Engineered for Repeatability

Repeatability is the hallmark of all Webscan products. The TruMatrix™ imaging head, with integrated 45º illumination and rugged housing, provides ideal conditions for verification with the CCD-based imager. After simple calibration there is nothing to focus and nothing to align! You are guaranteed the most accurate and stable verification results available.

TruMatrix eliminates operator variables and generates fast and accurate results!

Place the TruMatrix™ imager over the code and push the button for hands-free grading!

Complete Quality Analysis

TruCheck offers the most complete evaluation of code quality available. The parameters measured include:

- Unused error correction
- Modulation
- Axial non-uniformity
- Grid non-uniformity
- Symbol contrast
- Bar width growth (X and Y)
- Reference decode
- Finder pattern damage

Optional Linear Verification

TruCheck can be expanded with the TruSweep™ laser scanning head for linear and 2D (PDF417 & RSS) verification. With the touch of a button, the TruSweep head automatically provides multiple scans from top-to-bottom on the code.

Webscan is the leader in bar code verification solutions. Think Webscan for all your bar code verification needs!
